The Model 64 cermet trimmer from Vishay Spectrol incorporate improved design features making it one of the most advanced components of its type available in Europe. Giving maximum versatility with a choice of five pin styles and top or side adjustment. Available from 10Ω to 2MΩ, the Model 64 has 25 turns nominal travel and a resistance tolerance of ± 10%. Significant design features include the use of two Chevron sealing rings on the shaft, for more consistent torque and improved adjustability and flame retardant housing. A precious metal wiper significantly improves long term stability, making it particularly suitable for telecommunication applications.
